## Project Overview

The Eudora email client app is a comprehensive email management solution designed for users to manage their email accounts, streamline communication, and enhance productivity either for personal or professional use.

The app has a user-friendly interface that supports multiple users or email accounts, which allows users to send, receive, organize, and store emails.

It is built to support professional and personal users, with features to improve efficiency.

## Purpose

The purpose of the Eudora email client app is to provide a fast and secure platform for managing email communications. Users can send, receive, and manage emails through an intuitive and user-friendly interface.

This open-source project aims to provide a flexible and customizable email client that can be adapted for various use cases while supporting core email functionality. This app aims to:

1. **Enhance Email Organization:** Users can manage email categories for better inbox management.
2. **Improve communication:** Streamline sending, receiving, and managing emails.

## Installation Instructions

1. Download the .msixbundle file using the link provided.
2. Once downloaded, right-click on the .msixbundle file.

3. Click on “Properties.”
4. Click on “Digital Signatures.”
5. Select “Signature” from the list.
6. Click on “Details.”
7. Click “View Certificate.”
8. Click “Install Certificate.”
9. Go back and double-click the .mixbundle file.
10. Click “Install.”
11. Complete installation and launch the app.

## Usage Guide

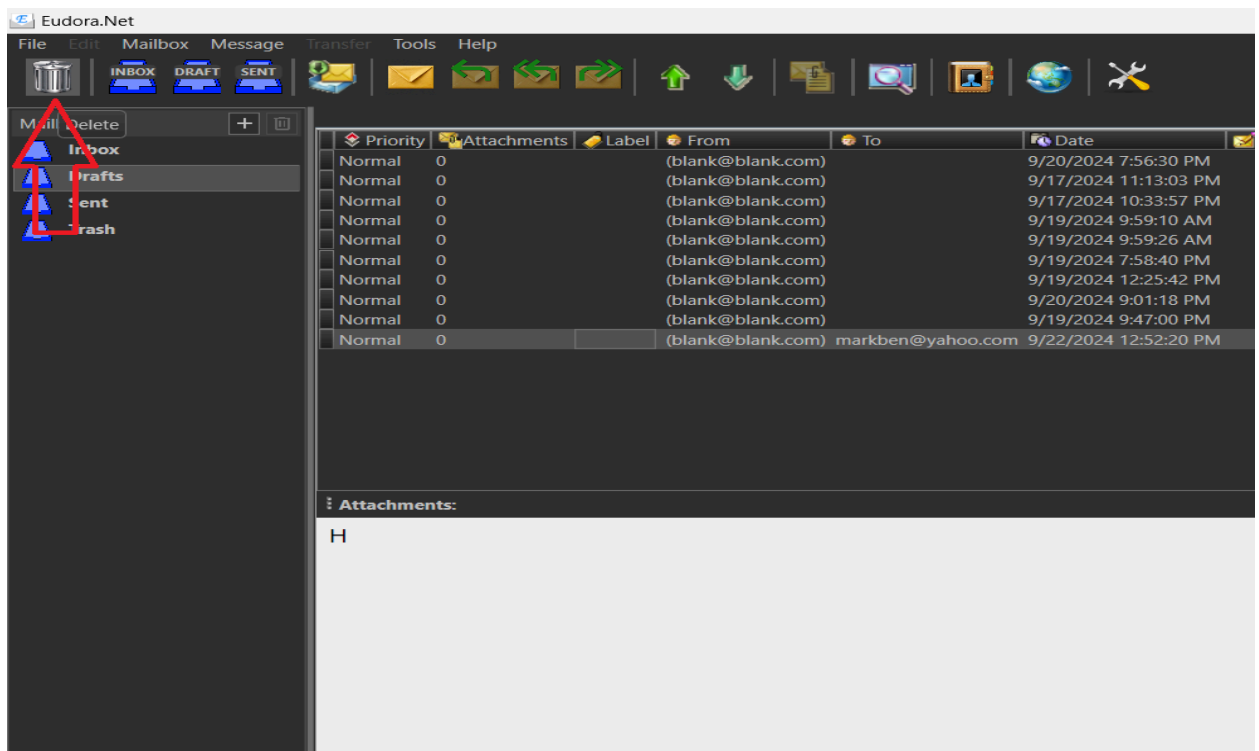

- **Sending Emails:** Click the “New message” button at the top left corner of the tab above and click the “New Message” button. Fill in the recipient’s email, and subject, add attachments if necessary, and write the message body before you send the email. You can also change the font, text style, and background.

- **Receiving Emails:** Once you receive an email it will automatically appear in your inbox. The Eudora app will check for new messages from the configured email server.
- **Managing Emails:** Organize your emails easily by marking them as read or unread, archiving, and deleting them. The app supports a standard folder structure like Inbox, Drafts, Sent, and Trash.
- **Searching Emails:** Use the search button at the center top of the toolbar section, and click on find messages to find sent, and received drafts, or emails in the trash.

- **Deleting Emails:** Navigate to the desired email you wish to delete, click on it once to select, then click on the delete button at the top left corner of the navbar.

## Features List

- **Inbox Management:** View and manage emails from the inbox, sent, drafts, and trash folders. This gives you full control over your inbox and the ability to manage it the way you want.

- **Send and Receive Emails:** Send, receive, and reply to emails through a user-friendly interface.
- **Email Drafts:** Save drafts of incomplete emails and send them later.
- **Search Functionality:** Easily search through emails either by the sender, subject, or keyword.
- **Email Trash:** Deleted emails go to the trash, you can recover the emails in situations where you may have deleted them by mistake.
- **Statistics:** Statistics show the total uptime of the Eudora app, the total time spent reading emails, and the total number of received emails, attachments received, emails sent, attachments sent, emails replied to, and emails forwarded and outgoing emails on a daily, weekly, monthly, and yearly basis.
- **Signature:** Create or modify an email signature, usually a block of text or information that appears at the end of your outgoing emails.
- **Email Attachments:** Send and receive attachments such as documents, images, etc with the Eudora app.
- **Internal Browser:** Open web links directly within the app without being redirected to an external browser, the web page is displayed in a simplified and secure view, ensuring a seamless browsing experience without leaving the Eudora app.
- **Address Book:** Store and organize your contact information, such as their email addresses, names, and phone numbers. When composing an email, easily select a contact from the address book instead of manually typing their email.
- **Personality:** Customize different aspects of your email account or identity which allows you to represent yourself in different ways.
- **Priority:** The priority refers to the level of importance attached to an email. This helps the recipient to understand how important the message is. High priority indicates that the email is important and requires immediate attention. Normal priority indicates that an email does not need immediate attention, this is the default setting used while sending emails. Low-priority emails are used for emails that can be responded to later.
- **Stationery:** Choose a customizable template or decorated background when sending emails. The template includes colors, graphics, fonts, or design elements that give your emails a more professional or personal look.

- **Reply Email:** Respond directly to the sender of an email. Use this feature when you receive an email and you want to reply to the original sender.
- **Reply to All Emails:** Respond to the sender and all other recipients included in the email. Use this when you want to reply to everyone involved in an email conversation.
- **Forward Email:** Forward a copy of the email to a new recipient who is different from the original sender.
- **Previous Message:** Easily navigate to the previous email in your inbox.
- **Next Message:** Easily navigate to the next email in your inbox.
- **Read Status:** Tracks and displays whether an email has been read or not which helps users manage their inbox efficiently.
- **Settings:** Configure and customize various aspects of the Eudora email client app to your preferred taste.
